VOLKSWAGEN CRAFTER**

EMERGENCY AMBULANCE CRAFTER – KEY FEATURES

SAFETY FIRST

Maximum protection in all circumstances.

RELIABILITY IN EVERY CONDITION

Built to withstand the toughest conditions

TOTAL CONTROL ON THE ROAD

Enhanced performance and stability.

OPTIMIZED SPACE

Maximum use of every available inch.

HIGH-VISIBILITY LIGHTING

Optimal visibility in all situations.

MAXIMUM COMFORT

Comfort that makes work easier.

MODULAR CONFIGURATION

A space tailored to your needs.

BETTER PERFORMANCE

More power, less consumption.

GLOBAL REACH

We help save lives around the world.

We develop specialized Volkswagen Crafter and MAN TGE vehicles that combine superior functionality, safety, and reliability. Through expert customization and advanced technological platforms, we ensure maximum alignment with the requirements of modern medical teams – at any time and in all conditions.

The comfortable and functional interior creates a safe and efficient working environment, while advanced safety systems guarantee protection in every situation. Precise craftsmanship and extensive experience deliver high-quality solutions that meet real needs in the field, even in the most demanding interventions.

SAFETY

Safety is the foundation of every model we develop. The structure is designed in accordance with EN 1789 and equipped with advanced safety systems. Crash tests confirm durability, ensuring maximum protection for patients and medical staff in all conditions.

RELIABILITY IN EVERY CONDITION

We engineer special vehicles to withstand even the most demanding conditions. Every detail, from the base structure to the interior fittings, is made with high-quality materials and proven processes. This guarantees long-lasting operation, stable performance, and reliability that medical teams can rely on in every situation.

TOTAL CONTROL ON THE ROAD

Our production range of special vehicles provides stable and safe driving in all conditions. The aerodynamic design and strong structure ensure reliable handling, reduced fuel consumption, and greater comfort for patients and crews.

OPTIMIZED SPACE

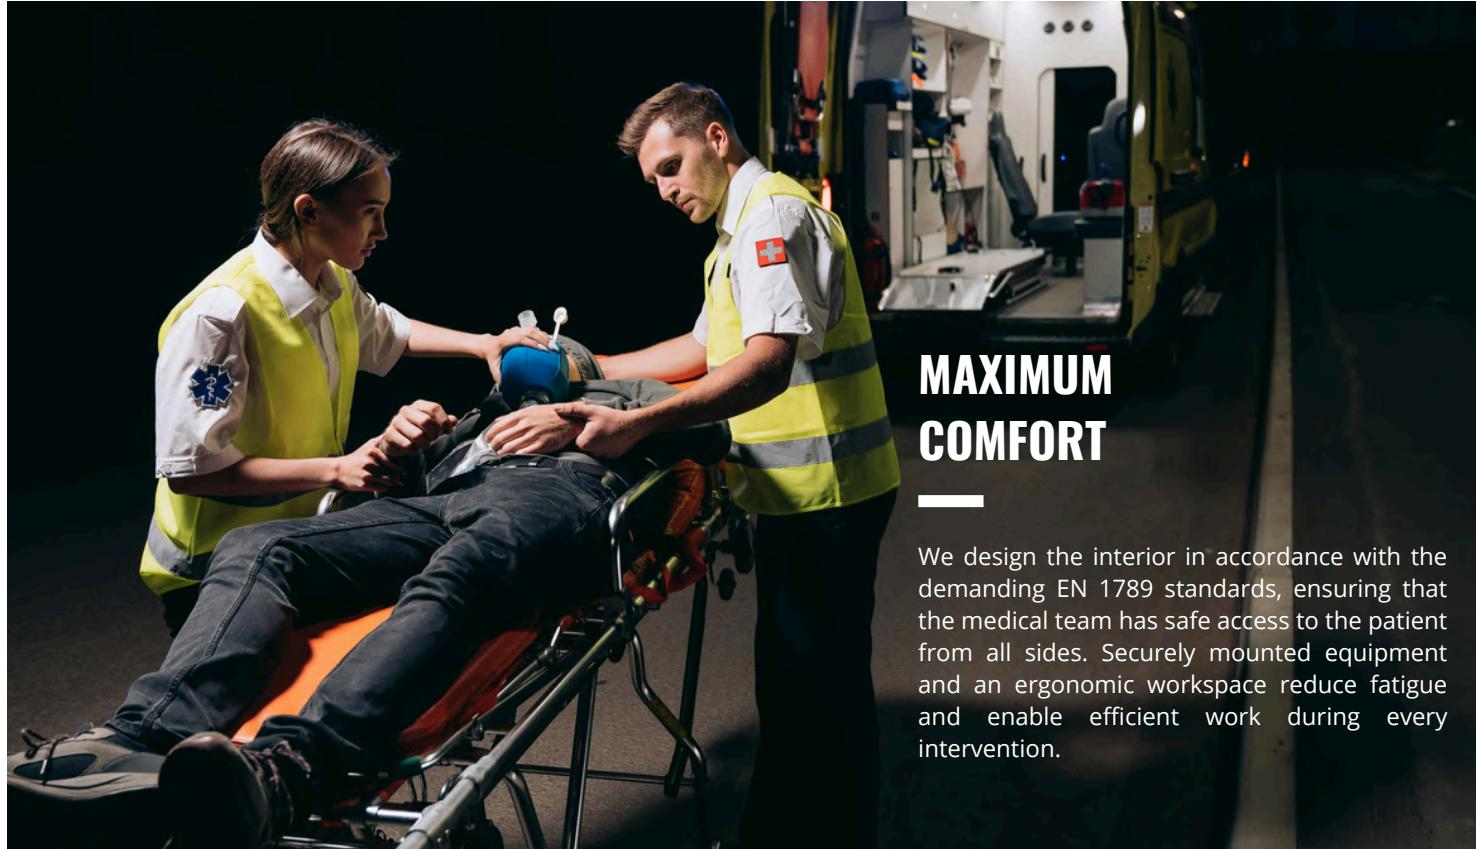

We design the interior so that everything is within reach. Large exterior compartments allow quick access to equipment from outside, while functionally arranged compartments in the medical area provide orderly and safe storage of medical devices. This saves valuable time and supports efficient work in emergencies.

HIGH-VISIBILITY LIGHTING

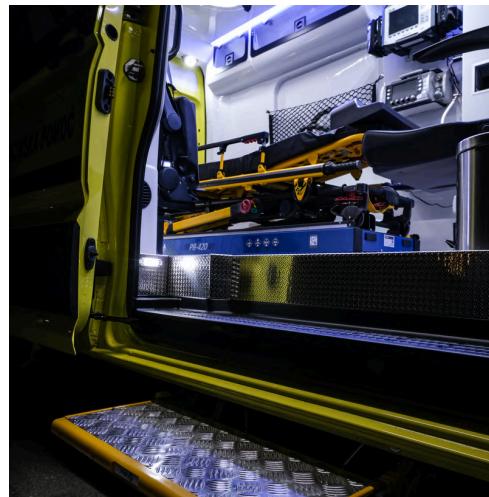

The lighting system ensures optimal working conditions inside the vehicle and maximum visibility in traffic. By combining interior working lights and external emergency signals, we achieve complete safety and reliability in all conditions, day and night.

MAXIMUM COMFORT

We design the interior in accordance with the demanding EN 1789 standards, ensuring that the medical team has safe access to the patient from all sides. Securely mounted equipment and an ergonomic workspace reduce fatigue and enable efficient work during every intervention.

MODULAR CONFIGURATION

We adapt our solutions to different medical protocols and user needs. The flexible interior layout allows the installation of additional equipment and systems, creating configurations that best support daily field operations.

BETTER PERFORMANCE

Our vehicles combine outstanding performance and maximum adaptability. With 130 kW diesel engines, they deliver exceptional power and reliability even in the most demanding conditions. They are available with either manual or automatic transmission, allowing adaptation to different driving styles and terrains. With a payload capacity of up to 3,500 kg and the possibility of driving with a category B license, these vehicles unite practicality and professional capabilities – making them the ideal choice for emergency medical interventions.

GLOBAL REACH

Our product range of special vehicles is used daily in different countries, adapted to various markets and standards. Through international deliveries, we confirm quality and reliability, contributing to saving lives worldwide.

MISSION

We develop special medical vehicles that provide maximum safety for patients and efficiency for medical teams in daily operations.

VISION

To be the regional leader in the production of special medical vehicles, with global reach and a constant focus on innovation, quality, and safety.
